

KALDEWEI

SOUND WAVE

Bathing in sound

A revolutionary audio system in the KALDEWEI bathtub lets you bathe in sound!
The bathtub becomes a sound box that lets you experience your music collection from your smartphone, laptop or tablet in a completely new way.

KALDEWEI SOUND WAVE

A UNIQUE SOUND EXPERIENCE ABOVE AND UNDER WATER

INFORMATION

HOW SOUND WAVE WORKS

The SOUND WAVE bathroom audio system is compatible with almost all KALDEWEI bathtubs and is already installed on the bathtub at the factory. Six acoustic panels and two transducers are glued to the outside of the enamelled steel bathtub body. This means that SOUND WAVE remains completely invisible. The sound transducers are connected to the receiver and control box and the box in turn is connected to the power supply.

SOUND WAVE can wirelessly play music from any Bluetooth® enabled device. The device (your smartphone, laptop, tablet, PC)

must be within a range of ten metres. Up to eight devices and people can be registered with SOUND WAVE at the same time – a fairly large family, for example.

STEP BY STEP

- ▶ Activate the Bluetooth® function and start the search
- ▶ Select your SOUND WAVE
- ▶ Control playback and volume on your device
