

KALDEWEI

Made in Germany since 1918

KALDEWEI shower surfaces
simply harmonious

KALDEWEI

Foreword

KALDEWEI has been setting bathroom trends for more than 100 years - with a keen eye for important developments and a keen sense of the changing role of the bathroom. Whereas multifunctional bathtubs used to be in demand, the contemporary bathroom requires one thing above all else: Individuality. And a creative shower surface solution in particular has become significantly more important. This makes it all the more important to be inspired and to take a closer look at materials and design.

We would like to share with you some sources of inspiration and newly developed shower surface solutions that inspire and motivate us in the new KALDEWEI Shower Surfaces magazine.

Transforming your bathroom into a very personalised place of well-being and retreat and enriching it with a floor-level shower is what drives us. When issues such as sustainability and the use of high-tech materials are incorporated into the bathroom design, the result can only be outstanding. Our objects of timeless beauty, unique comfort and superior function - especially in terms of hygiene - are definitely the best prerequisite for a dream shower surface that will inspire you.

So: show your sophistication! And look forward to taking your bathroom to the next level!

A handwritten signature in black ink, reading 'Franz Kaldewei'. The signature is stylized with a large, sweeping initial 'F' and a cursive script for the rest of the name.

Yours, Franz Kaldewei

Burning with passion

IN THE BEGINNING, THERE WAS STEEL AND GLASS

We don't just talk about sustainability. We live it, we produce it. The natural raw materials of glass and steel - from which our bathroom objects are made - are proof of this. Two authentic, natural materials with unique material properties. Steel stands for strength, high resilience, robustness and mouldability. Glass offers an exquisitely luxurious look and is particularly resistant to chemical or thermal stress. Robust steel and resistant glass form an inseparable bond in KALDEWEI steel enamel, combining the strengths of each material to create an ideal symbiosis.

A perfectly crafted enamel surface is like glass, and is many times less susceptible to germs and pathogens.

MASTERFULLY PERFECT

The basis of this symbiosis is the unique recipe of KALDEWEI steel enamel. A recipe that we are the only manufacturer in the world to have developed ourselves and which we still use exclusively for our own production. In our own melting furnaces at our headquarters in Germany.

WE ARE ALREADY THINKING ABOUT TOMORROW TODAY

KALDEWEI steel enamel - the most sustainable, best and most resistant material for your shower surface. To keep it that way, we are continuously developing the formulation and production technology with the expertise we have acquired over decades. For pioneering innovations such as particularly slip-resistant coatings and ever new, inspiring colour variations. Experience the fascination of our KALDEWEI steel enamel for yourself. We promise you will be amazed. Today and tomorrow.

A full-page photograph of an industrial welding process. A large, dark, cylindrical metal component is being welded. A bright, intense orange-yellow flame from a welding torch is visible, creating a large plume of white steam or smoke on the left side. Sparks are flying from the point of contact between the torch and the metal. The background shows a complex industrial structure with metal beams and pipes. The floor is made of dark, square tiles.

WE CREATE VALUES THAT ARE SUSTAINABLE SIMPLY BECAUSE
OF THEIR UNUSUALLY LONG SERVICE LIFE.

Steel enamel at a glance

THE ENAMEL FRIT PRODUCED BY KALDEWEI IS A COARSE POWDERED GLASS WHICH IS LATER MELTED AND APPLIED TO THE STEEL BODY. THE FRIT IS BONDED TO THE STEEL AT HIGH TEMPERATURES. THE RESULT IS AESTHETICALLY SMOOTH, GLASS-LIKE SURFACES WITH MAXIMUM RESISTANCE TO ABRASION AND CORROSION.

DIMENSIONALLY STABLE - STAYS IN SHAPE

KALDEWEI steel enamel retains its shape even with high temperature fluctuations. 100 % free from hairline cracks and therefore no risk of water damage.

SURFACE PROTECTION - FOR A LIFETIME

Perfume, washing gels, cosmetics, nail varnish, shampoos, household cleaning agents, chemical and natural hair dyes - KALDEWEI steel enamel is immune to almost everything.

UV-RESISTANT - RADIANT COLOUR

Thanks to our unique, colourfast and lightfast KALDEWEI steel enamel, your shower surface will permanently retain the original colour you have chosen.

100 % SUSTAINABLE**RESPONSIBLE BATHROOM OBJECTS**

Glass and steel are the basis of KALDEWEI steel enamel. A material made from natural raw materials and 100 % recyclable. That is sustainability in action.

SCRATCH AND IMPACT RESISTANT - AS HARD AS NAILS

Whatever your KALDEWEI encounters - shower gel bottle, razor, brush - it always remains immaculately beautiful!

HEAT-RESISTANT - FIRE PROTECTION INCLUDED

Cigarettes, matches, candles - your KALDEWEI is both fire and stain-proof.

EASY-CARE AND HYGIENIC - CLEAN AND NON-POROUS

The glass surface offers you optimum, full-surface protection against viruses, dirt and bacteria. It is absolutely hygienic and also easy to clean. More cleanliness is hardly possible.

30-YEAR GUARANTEE*

So that you can enjoy your KALDEWEI for a long time - and the good feeling of having made the right choice.

* In accordance with our applicable warranty conditions.

A bathroom is a living space. To draw strength and recharge your batteries. To refresh, recuperate and relax. And it is a decision. A statement that reflects you. With your lifestyle, your philosophy of life. Today and tomorrow. Sustainable.

Traditionally visionary

TRADITION

We are a family business with strong roots: Now in the fourth generation, we develop and manufacture masterful bathroom objects of perfect quality. With the same claim for over 100 years: to create perfect solutions from the highest quality materials and iconic design - taking into account the highest demands and made for every room situation.

PASSION

Whether shower surface, bathtub or washbasin - steel enamel is our raw material and passion is what drives us: for the highest precision, for timeless aesthetics and the technical challenges that we master as pioneers. This passion has characterised our employees for generations. They have made us the epitome of long-lasting bathroom objects. Only they are able to bring our high standards of design, product and manufacturing quality to life. Yesterday, today and in the future.

SUSTAINABLE

Anyone who has been transforming natural raw materials into durable, timelessly beautiful products for more than 100 years and thinks in terms of generations has firmly and immovably anchored the issue of sustainability in their DNA. Especially as our enamelled steel is the future-proof material for sanitary products, is 100% recyclable and consists of at least 20% recycled steel. It is therefore only logical to make production and transport just as resource-efficient. To protect our environment and with our future generations in mind.

AWARD EXCELLENCE

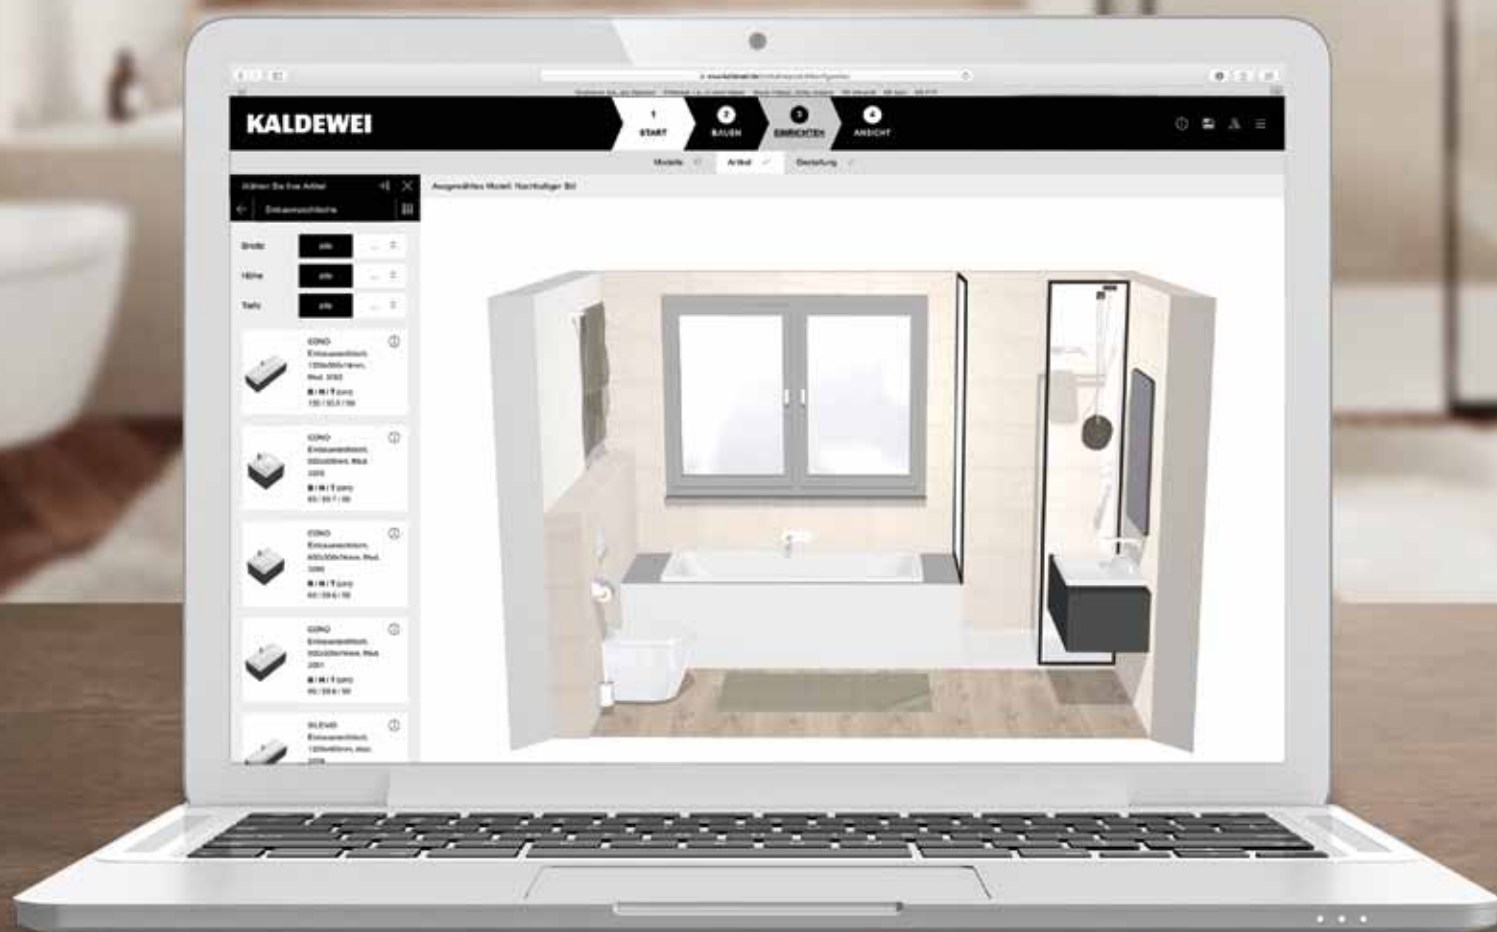

In 2017, we were honoured for our resource-conserving philosophy with one of the most prestigious sustainability awards for ecologically outstanding products and buildings: the "Green Good Design Award". A further step on our path to a future worth living. We are consistently shaping this in terms of sustainable business practices and the sustainable use of resources. For example, we were the first sanitary ware supplier to draw up the environmental product declaration in accordance with the IBU (Institut Bauen und Umwelt), we are a member of the DGNB, the German Sustainable Building Council, and in 2020 we signed the SBTi, the Science Based Targets initiative, which commits companies to the consistent and transparent reduction of greenhouse gases. In 2021, we processed the first climate-friendly steel in the sanitary industry and offer KALDEWEI nature protect, a 100% circular, durable product line that is up to 70% CO₂-reduced. In addition, we will be audited by the Cradle to Cradle Products Innovation Institute Inc. in 2024 and will receive the Cradle 2 Cradle certificate for the steel enamel products in alpine white.

DESIGN

Our more than 150 awards, such as the Red Dot Design Award, Plus X Award, Iconic Awards, Interior Innovation Award, German Design Award, Design Plus, Good Design and iF Product Design Award prove that, in addition to quality and sustainability, we always emphasise perfect design. Our designers create products, looks and shapes that give your bathroom its special character and timeless beauty.

SUPERPLAN ZERO SHOWER SURFACE

01

Your living situation:
Are you single, a couple or a family with children?

02

In which floor plan would you like to install your dream bathroom or the shower oasis you have planned?

03

Consider all the bathroom objects with which your dream bathroom should be equipped in order to achieve optimum utilisation of the space.

04

Be inspired by our creative bathroom ideas.

05

How large should or may your shower surface be?

Your path to the perfect bathroom in ten steps

Would you like to renovate, modernise and redesign your bathroom or install a completely new one? You are welcome. Discover the most convenient way to plan your bathroom with the new KALDEWEI online bathroom planner.

BATHROOM PLANNER

06

Would you like a raised or floor-level shower surface?

07

What is your favourite colour? Should it have a radiant shine or a matt shimmer?

08

Is optimised stability important to you? Then take a look at our non-slip surfaces.

09

Ask your bathroom planner for advice on design and equipment options.

10

Discuss installation and realisation with your plumber and look forward to your new dream bathroom.

Shower surfaces

Elegant design.
Perfect shapes.
Long-lasting.

NEXSYS

The KALDEWEI NEXSYS combines the best of both worlds - all the advantages of an enamelled shower surface and the modern design of a channel shower. A completely ready-to-install system in which all components are already connected and ready for installation in a compact and easy-to-install way.

In addition to its award-winning design, NEXSYS offers long-lasting functional hygiene in KALDEWEI steel enamel. The designer waste covers in gold, rose gold, stainless steel or alpine white turn this special shower tray system into a real piece of jewellery. NEXSYS - an object you could fall in love with.

Next generation
shower surface
system.

CONOFLAT

For modern,
stylish aesthetics,
for unlimited
freedom of
movement and
optimum standing
comfort.

The CONOFLAT floor-level shower offers an extremely flat design without any tripping hazard. The enamelled waste cover blends seamlessly into the flush-to-floor surface.

But the CONOFLAT not only guarantees exclusive showering pleasure, it also fits perfectly with the CONODUO bath and the CONO washbasin thanks to its consistent design concept.

DIMENSIONS (P. 36) - COLOURS & SURFACES (P. 41)

SUPERPLAN

The classic in a new design.

Proven a million times over, now with a new look for modern bathrooms. Following the current facelift of what was once the first floor-level KALDEWEI shower surface, the fresh design takes the classic SUPERPLAN to a new level. True to the motto of making the best even better.

The precise and clear lines give the shower a modern appearance. While the corner waste offers a high degree of flexibility in terms of positioning, the fully floor-level access on two sides and the optimised edge allow a generous standing area throughout and an increased range of movement. KALDEWEI SUPERPLAN - the innovative classic for today's bathroom.

DIMENSIONS (P. 37) - COLOURS & SURFACES (P. 41)

SUPERPLAN ZERO

Floor-level
masterpiece
made of
sustainable steel
enamel.

The SUPERPLAN ZERO designed by Werner Aisslinger is a highlight for any bathroom: the threshold-free access and the extremely precise corner radii make the elegant shower surface shine against the surrounding tiling.

An extra generous standing area with a barely perceptible slope and the waste close to the wall guarantee special showering pleasure.

DIMENSIONS (P. 37) - COLOURS & SURFACES (P. 41)

CAYONOPLAN

The gateway
to the world
of floor-level
shower surfaces.

With a variety of 33 dimensions and the side waste, the CAYONOPLAN is the ideal solution for every bathroom. Thanks to its low rim height, the CAYONOPLAN is perfect for installation on tiles. It can also be installed flush with the floor without any problems.

PERFECT MATCH

CAYONO BATHTUB AND CAYONO WASHBASIN ROUND OFF THE BATHROOM DESIGN PERFECTLY TOGETHER WITH THE CAYONOPLAN.

DIMENSIONS (P. 38) - COLOURS & SURFACES (P. 41)

THE RED DOT DESIGN AWARD-WINNING SHOWER SURFACE IS THE BARRIER-FREE, HARD-WEARING AND PRECISELY FITTING ALTERNATIVE TO A FULLY TILED SHOWER FLOOR.

CAYONOPLAN MULTISPACE

Mini bathroom big time

Who says that a dream bathroom always has to be big? With the CAYONOPLAN MULTISPACE shower innovation, KALDEWEI makes even small bathrooms look big. Planned as an additional movement area, the floor-level shower surface performs true space miracles even in the tightest of spaces. Even a mini bathroom of just four square metres invites you to feel good, and thanks to the large format of 1.20 x 1.20 m, there is no need to forego a generous showering experience.

What's more, the CAYONOPLAN MULTISPACE is the first DIN CERTCO-certified shower with a movement area and therefore fulfils the requirements for a barrier-free bathroom in accordance with DIN-standard 18040-2, allowing you to benefit from various funding opportunities when installing or converting.

FLOWLINE ZERO

STEEL BRUSHED SURFACE

The exclusive shower profiles are an eye-catching feature in the bathroom, with design and function at their best.

Design Werner Aisslinger

CLICK'N CLEAN® mechanism for quick and easy cleaning.

FLOWLINE ZERO

The revolutionary shower channel made of high-quality stainless steel meets the highest demands: the KALDEWEI FLOWLINE ZERO not only impresses with its multi-award-winning design with versions in alpine white, manhattan, graphite, black and matt white, it can also be operated with just one hand thanks to its intelligent opening mechanism.

Three standard lengths of 90 cm, 120 cm and 150 cm are infinitely adjustable and can be positioned either in front of the wall or directly on the wall. Adjustable height levellers allow variable installation heights. The FLOWLINE ZERO guarantees efficient drainage for perfect flow.

Ideal for individual installation requirements, the KALDEWEI FLOWLINE ZERO gives all shower floors, whether tiled or without joints, a special exclusivity.

"An excellent example of product design that emphasises aesthetics while offering great functionality and ergonomics."

Expert jury of the iF Design Award

KALDEWEI CLICK'N CLEAN®

Innovation for
cleanliness in the
bathroom.

EASY TO USE

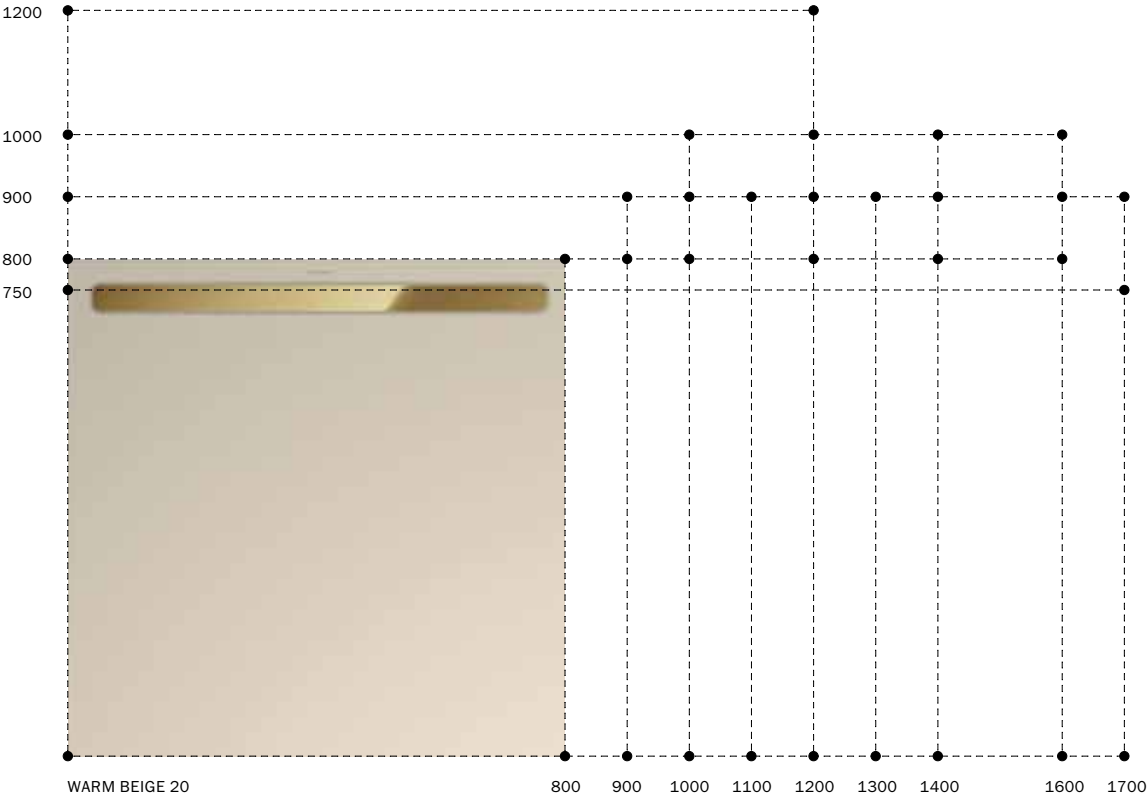

The cover of the KALDEWEI FLOWLINE ZERO with the patent-pending CLICK'N CLEAN® mechanism can be opened and closed with just one hand. For lightning-fast, hygienic cleaning.

KALDEWEI CLICK'N CLEAN®. It can be that simple.

OUR COLOURS ARE INSPIRED BY NATURE. THEY CAN BE FREELY COMBINED AND FINELY COORDINATED WITH EACH OTHER, EMPHASISING THE SPECIAL CHARACTER OF OUR EXCLUSIVE SHOWER SURFACES. THE WELL THOUGHT-OUT CONCEPT OF THE WIDE RANGE OF COLOURS ALLOWS YOU AN INFINITE NUMBER OF COLOUR COMBINATIONS AND SETS NEW STANDARDS IN TERMS OF COLOUR HARMONY AND VALUE.

Installation variants

FLOOR-LEVEL

When installed flush with the floor, your shower surface forms a homogeneous and seamless level with your tiles, industrial screed, stone or wooden floor. Free and stepless access for maximum space when showering - even in the smallest of bathrooms.

ALMOST FLUSH WITH THE FLOOR

With a slight offset and a small contrasting edge, your shower surface sits almost flush with the floor and enables optimised water drainage even when installed on concrete, stone, ceramic, wood, vinyl or marble. Ideal for retrofitting and installation.

SHOWER SURFACE PLATFORM

Your shower surface stands out from the bathroom floor and attracts everyone's attention - as a design object and eye-catcher in your old bathroom. The ideal solution for enhancing your bathroom with one of our premium designer shower surfaces. The most beautiful form of showering.

At one with your tiles, your bathroom floor. Slightly raised to enable a slope. Whether flush with the floor, almost flush with the floor or as a shower surface platform...

We offer you the best solution for all installation heights. Including first-class installation components in the form of seals, sound insulation and installation products. We have developed every single one of these high-quality components especially for our elegant KALDEWEI shower surfaces, so that form and function fulfil your quality requirements.

WATERPROOF - KEEPING THINGS SEALED

With our KALDEWEI sealing solutions, you can effectively protect your silicone joints against moisture migration. On walls, surface edges and floors - in all directions. The most reliable protection against water damage.

SILENCE PLUS - EXCEPTIONALLY QUIET

We have designed highly efficient sound insulation systems in accordance with DIN 4109 and VDI 4100 so that you can shower almost silently at any time of day or night. Even your neighbours will be pleased. Ask your specialist about our DWS shower surface sound insulation set and our DW-ADS shower surface anti-drumming set.

PERFECTLY INSTALLED - INSTALLATION MADE EASY

Our sophisticated, first-class KALDEWEI installation products, often pre-assembled as a complete set at the factory, save your installer valuable time and you money for high hourly wages.

FULLY IN THE FLOW

Flat is in vogue. Both for the shower surface and the waste. In new builds and renovations. We supply you with the right waste fitting for your shower surface and installation situation. With a matching cover or elegant Designer covers. You can rely on outstanding drainage performance!

Surface finishing

EASY-CLEAN FINISH

Thanks to our easy-clean surface finish, water runs directly off your shower surface, taking virtually all dirt and limescale particles with it. Despite the easy-clean finish, simply remove any water stains and limescale residue with a soft, damp cloth - without using any harsh chemicals or cleaning agents. This surface finish is therefore also a clean solution for the environment. The easy-clean finish is permanently baked into the enamel surface of your KALDEWEI shower surface, is extremely durable, extremely long-lasting and available for all shower surfaces.

INVISIBLE GRIP

INVISIBLE GRIP is a revolutionary, invisible and imperceptible surface finish for anyone who wants a secure footing but does not want to compromise on aesthetic splendour in the bathroom. INVISIBLE GRIP optimises barefoot slip resistance when used with water and soap. When dry, the surface appears as shiny as usual and is easy to clean. When stepping on the wet enamel surface, an almost invisible micro-structure provides more grip. This visually attractive solution of the refined, brilliant steel enamel surface is available for shower surfaces and bathtubs in alpine white.

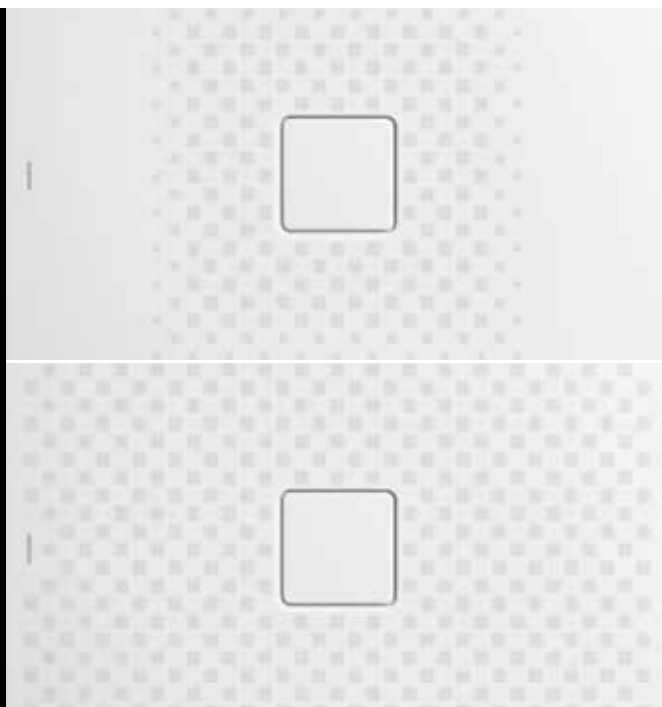

ANTI-SLIP SECURE PLUS

The KALDEWEI ANTI-SLIP SECURE PLUS enamelling developed by us is applied to the full base of your shower surface and gives you a secure hold when showering. We offer this enamelling in all colours of the matt COORDINATED COLOURS COLLECTION.

**PARTIAL AND FULL ANTI-SLIP**

The structured surface texture provides a secure footing when showering. This anti-slip surface coating guarantees grip when applied at specific points and in the centre or as a full-base variant. The result: a round or square anti-slip coating to match the design of the waste cover, combining beauty and safety.
